We especially urge those for whom we have furnished glasses to call occasionally that we may keep your frames in proper shape. We make no charge for this work, only glad to aid our many friends by rendering them this courtesy. We can examine the outside of your eyes and the muscles thereto and by the advanced methods and science of retinoscopy can measure the power of refraction the eyes have, and can see inside of the eyeball and learn that which is necessary to know, enabling us to properly fit glasses and frames to all our patients. Let us keep your glasses in shape as that is very important.

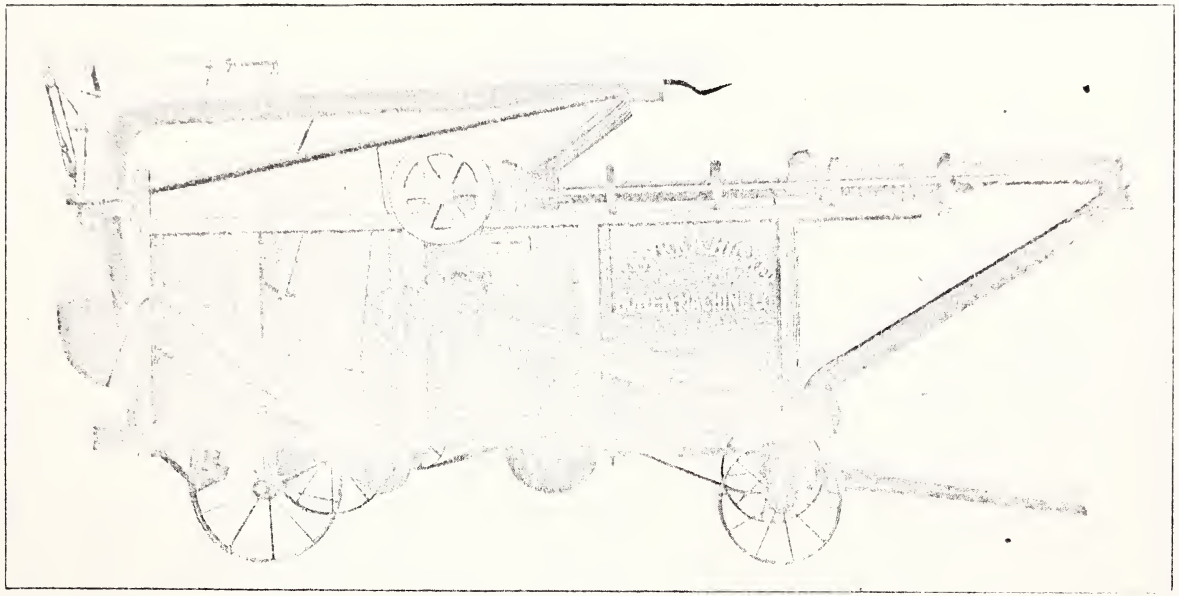
EUREKA HUSKER AND SHREDDER



The best machine made. It is perfectly safe. No danger of any one getting hurt while working around or with it unless he just purposely gets in it. It shells very little corn, takes all of the shelled corn out of the fodder and puts it in the sack.

DALE THE PRINTER

A careful perusal of this book will convince you that we are quite capable of turning out anything in the printing line in a satisfactory manner.

Good printing, not any old kind, will increase your business. DALE THE PRINTER does good printing. Call on him and he will explain what is meant by GOOD PRINTING.

We would be pleased to show you samples of our work. We are especially proud of our imitation typewriter letters. Ask to see one. We will guarantee that no other office in town can excel us in this or any class of work.
